

Specialist Periodontist and Implantologist

Mr. Malcolm Riley BDS (Lon), LDS RCS(Lon), FDS RCS(Lon), MRD(Ed), FDS RCS(Ed)

Malcolm is a Specialist Periodontist. He graduated from King's College Dental School in 1971. After several years in general practice, he undertook his specialist periodontal training at Tuft's Dental School in Boston USA between 1979-81. He was Consultant Periodontist at Riyadh AL-Kharg Hospital in Saudi Arabia from 1993-1997. He is now a clinical lecturer at the Eastman Dental Institute in London in the Department of Continuing Education.

Malcolm's approach to periodontics is to develop definitive treatment plans as early as possible. He has considerable experience in aesthetic and pre-prosthetic periodontal surgery and it happy to discuss cases with referring dentists. He is also experienced in both hard and soft tissue regeneration techniques. These include the treatment of intra-bony defects and the treatment of recession with Emdogain and connective tissue grafts.

Malcolm has a special interest in soft-tissue implant aesthetics. He places and restores Straumann implants. However, he will ONLY place implants on patients who are referred specifically for this, otherwise periodontal patients are returned to the referring dentist for their implant work. He is on the teaching faculty for Straumann and mentors dentists in their own practices who are beginning to use the Straumann system.

Treatments available

Implant dentistry:

- Placement of implants for referring dentist to restore.
